

WASTE AND PROCESS WATER QUESTIONNAIRE:

1. Describe your system(s) and the challenge(s) you face:

2. Target compound(s) and concentration(s)

3. Daily flow rate:
4. Does your system run continuously?
 - a. If not, how many hours per day, days per week, etc.?
 - b. Is flow rate constant or variable? If variable flow rate, range variations:

5. pH:
6. Oxygen demand (COD, BOD, or TOD):
7. Available Retention Time:
8. Dewatering Method (if sludge/fiber dewatering):

9. Current treatment method(s) do/have you used?
 - a. Are/were they successful?
 - i. Daily cost of treatment (est.):

Please attach any process flows/diagrams and water chemistry data you have available which will aid us in reviewing your application.
